REPRESENTATIVE: Ray Myers/Gray Kiser **PRESENT ZONING:** R-30
PHONE: 404-352-2200 **LAND LOT(S):** 890

COMMENTS

TRAFFIC: This request will not have an adverse impact on traffic.

DEVELOPMENT & INSPECTIONS: If the variance is approved building permits will be required prior to construction of the trellis and retaining wall and all applicable inspections will need to be scheduled during the process of the construction. If this variance request is approved, a subdivision plat revision must be recorded prior to the issuance of the letter of completion showing all improvements on the lot and referencing the variance case in the standard plat revision note. The surveyor must submit the plat to the Site Plan Review Section, Community Development Agency for review and approval prior to recording. Call 770-528-2147.

STORMWATER MANAGEMENT: The rear of this existing lot is very steep with an average slope of 25%. Construction of the proposed 4 – 12 foot retaining wall will significantly alter the existing drainage to the adjacent lot to the rear. If this variance is approved a drainage plan should be provided to show how lot drainage will be accommodated to not adversely impact the downstream property. Also, the existing impervious coverage for this lot is approximately 30%. It is unclear on the proposed plan how much of the improvements will be impervious surface. The total coverage cannot exceed 35%.

HISTORIC PRESERVATION: After examining Civil War trench maps, Cobb County historic property surveys, county maps, and various other resources, staff has no comments regarding the impact or treatment of historic and/or archaeological resources.

CEMETERY PRESERVATION: No comment.

WATER: No Conflict.

SEWER: No Conflict.
