ADDITIONAL COMMENTS

- 1. This parcel is located to the west of Wesley Chapel Road and is bounded by the Robert Hicks Farm to the south and Garrison Elementary School to the north and west. Approximately a third of the site drains to the south along the right-of-way of Wesley Chapel Road. The remainder of the site drains to the southeast through the Robert Hicks Farm property. Stormwater conveyance through this parcel is limited. There is an existing 18-inch CMP culvert located at the property line that flows under an existing barn/shed. This pipe discharges into an existing farm pond with limited spillway capacity. Detailed hydraulic analysis will be required at Plan Review to verify no adverse impact to these offsite systems.
- 2. While the location of the detention pond is at the low point of the site, the proposed access from the right-of-way is along the southern boundary of the site and will require total clearing for maintenance access. This will eliminate any buffer for the adjacent property owner.
- 3. A pre- and post-development sediment survey will be required for the downstream farm pond.

APPLICANT: Richard Duncan	PETITION NO.: <u>Z-27</u>

TRANSPORTATION COMMENTS

The following comments and recommendations are based on field investigation and office review of the subject rezoning case:

ROADWAY	AVERAGE DAILY TRIPS	ROADWAY CLASSIFICATION	SPEED LIMIT	JURISDICTIONAL CONTROL	MIN. R.O.W. REQUIREMENTS
Wesley Chapel Road	2400	Minor Collector	35 mph	Cobb County	60'

Based on 2002 traffic counting data taken by Cobb DOT (Wesley Chapel Road)

COMMENTS AND OBSERVATIONS

Wesley Chapel Road is classified as a minor collector and according to the available information the existing right-of-way does not meet the minimum requirements for this classification.

RECOMMENDATIONS

Recommend applicant consider entering into a development agreement pursuant of O.C.G.A. 36-71-13 for dedication of the following system improvements to mitigate traffic concerns: a) donation of right-of-way on the west side of Wesley Chapel Road, a minimum of 30' from the roadway centerline.

Recommend curb, gutter, and sidewalk along the Wesley Chapel Road frontage.

Recommend curb and gutter along both sides and sidewalk along one side of proposed development roadway.

Recommend applicant verify that minimum intersection sight distance is available for Wesley Chapel Road access and if it is not, implement remedial measures, subject to the Department's approval, to achieve the minimum requirement of 390 feet.

Recommend no advertising on the right-of-way.

Recommend no monument signs on the right-of-way.

Recommend applicant be required to meet all Cobb County Development Standards and Ordinances related to project improvements.

STAFF RECOMMENDATIONS

Z-27 RICHARD DUNCAN

- A. It is Staff's opinion that the applicant's rezoning proposal will not permit a use that is suitable in view of the use and development of adjacent and nearby properties. While there are R-15 properties in the area, applicant's proposed density is higher than those developed R-15 properties.
- B. It is Staff's opinion that the applicant's rezoning proposal will have an adverse affect on the usability of adjacent or nearby property. Abutting properties are zoned R-30 with a school and a single-family house on a large tract and immediately across Wesley Chapel Road properties are zoned R-20 prior to entering Loch Highland Subdivision.
- C. It is Staff's opinion that the applicant's rezoning proposal will result in a use which would cause an excessive or burdensome use of existing streets, transportation facilities, utilities, or schools. This opinion can be supported by the departmental comments contained in this analysis.
- D. It is Staff's opinion that the applicant's rezoning proposal is in conformity with the policy and intent of the *Cobb County Comprehensive Plan*, which delineates this property to be in the Low Density Residential (LDR) land use category having densities ranging from 1-2.5 units per acre. Other R-15 densities in the area range from 1.64 units per acre (The Highlands at Wesley Chapel West); to 1.69 units per acre (Village North Highlands); to 1.71 units per acre (Loch Highland, U3, Section 3); to 1.86 units per acre (Springmill). Applicant's proposed R-15 development had a density of 2.07 units per acre.
- E. It is Staff's opinion that there are existing and changing conditions affecting the use and development of the property which give supporting grounds for deleting the applicant's rezoning proposal. Applying the density average of 1.75 units per acre from the Zoning Ordinance for R-20, three lots could be developed yielding an approximate density of 1.55 units per acre, similar to other densities in the area and remaining under two units per acre.

Based on the above analysis, Staff recommends **DELETING** the request to R-20 subject to the following conditions:

- District Commissioner to approve final site plan and minor modifications thereafter;
- Water and Sewer comments and recommendations;
- Stormwater Management Division comments and recommendations;
- DOT comments and recommendations; and
- Owner/developer to enter into a Development Agreement pursuant to O.C.G.A. §36-71-13 for dedication of system improvements to mitigate traffic concerns.

The recommendations made by the Planning and Zoning Staff are only the opinions of the Planning and Zoning Staff and are by no means the final decision. The Cobb County Board of Commissioners makes the final decisions on all Rezoning and Land Use Permits at an advertised public hearing.
