Re: **Application for Variance Cobb County – Additional Pages
SkyGroup Investments, LLC**

Dear Mr. Martin,

On behalf of my client, please see below our responses to the Variance Application questions:

The Cobb County Zoning Ordinance Section 134-94 states that the Cobb County Board of Zoning Appeals must determine that applying the terms of the Zoning Ordinance without the variance would create an unnecessary hardship. Please state what hardship would be created by following the normal terms of the ordinance (If applying for Backyard Chickens pursuant to Sec.134-94(4), then leave this part blank).

SkyGroup Investments, LLC, the applicant, proposes to develop an approximately 5,034 square foot, 58' tall iFly Indoor Skydiving facility, with associated utilities, access, drives, and parking spaces to support the proposed facility. . iFLY (formerly SkyVenture) has been the innovation leader in indoor skydiving since opening its first facility in Orlando in 1998. It has created technologies which enable a nearly 50ft. high flight chamber which creates a cushion of air that is enclosed, recirculating and air conditioned. It is not possible to fall off the cushion of air, making this experience safe for kids as young as three and adults of any age. The building height and design is a critical component of the indoor skydiving experience, as the entire building comprises a circuit of duct work which makes flight possible within the internal flight chamber.

Building Height Variance Request

The proposed 58 foot building height is a function of the intended use of the facility. The 50 foot building height restriction creates a hardship since the building cannot function as intended at this height.

Additionally, the small footprint of the site presents challenges with placing the building footprint on the site, with the need for supporting access and parking. The small footprint of a site, being under 1 acre, is not typical for commercial development of this square footage and space requirements.

Due to numerous surrounding structures of similar height or greater height, as well as an elevated interstate overpass, the proposed increase in building height would not cause any substantial detriment to the public good or impair the purposes and intent of the Code.

Signage Variance Request

FLY sees the requested signage as critical to achieve awareness of its brand within the Atlanta market, to which iFLY is a new entrant. The minor increase in allowable signage will allow for better direction to the site as drivers navigate Cobb Parkway. Additionally, no ground or monument signs are proposed for this site and the 2 existing monument signs will be removed.

The existing site topography has steep slopes and retaining walls around the adjacent parcels. This places the finished floor elevation much lower than areas north and west of the site along Cobb Parkway. An existing billboard is adjacent to the site that will impede visibility of the signage on the building frontage for vehicles travelling south on Cobb Parkway.

Due to adjacent signage, grade changes and removal of existing monument signage, the increase in building signage would not cause any substantial detriment to the public good or impair the purposes and intent of the Code.

Landscape Buffer Variance Request

The proposed development is located on an approximately 0.922 acre site that is approximately 200' wide and current restrictions of building setbacks and landscape strips, impede the ability to develop without the variances for the removal of the landscaping listed below. The site will meet the building setback requirements and the required 8' landscape strip will be provided along the Cobb Parkway Right of Way.

The site width is not wide enough to allow for the setbacks, building footprint, pedestrian access, parking, and access drive, while maintaining an 8' Landscape Strip along the ROW for the I-285 On-Ramp.

The application of this requirement to this particular piece of property would create an unnecessary hardship as the building, access and parking required to serve this development cannot be provided in the width available.

The sharing Right of Way with Cobb Parkway and a restricted access On-Ramp is abnormal, and the small width of the property presents challenges.

Relief, if granted, for the removal of the 8' Landscape Strip would not cause any substantial detriment to the public good or impair the purposes and intent of this chapter. The existing

development currently does not have an 8' landscape strip and additional greenspace exists in the Right of Way.

Parking Stall Depth Variance Request

The proposed development is located on an approximately 0.922 acre site that is only approximately 200' wide and current restrictions of building setbacks and landscape strips, impede the ability to develop without the variance for the reduction of Parking Stall depth from 19' to 18' on the southeast side of the building. The site will meet the building setback requirements.

The site width is not wide enough to allow for the setbacks, building footprint, pedestrian access, 19' deep parking stalls, and access drive, while tying into grades along the ROW for the I-285 On-Ramp.

The application of this requirement to this particular piece of property would create an unnecessary hardship as the building, access and parking required to serve this development cannot be provided in the width available, and tie-in to existing grades with 19' stalls.

The sharing Right of Way with Cobb Parkway and a restricted access On-Ramp is abnormal, and the small width of the property presents challenges.

Relief, if granted, for the reduction of the allowable parking stall depth from 19' to 18' would not cause any substantial detriment to the public good or impair the purposes and intent of this chapter. A parking stall depth of 18' is an industry standard used in development nationally, the proposed parking stalls will not be facing opposite parking so there will be allowable overhang, and with a 9' wide stall the requirement of 162 square feet is met.

List type of variance requested:

- Increase in the allowable building height from fifty (50) feet to fifty-eight (58) feet.
- Allow for the signage as shown in the provided signage package. This includes:
 - A one hundred and ten (110) square foot sign on the south side of the site that faces the Right-of-Way for the on-ramp to I-285. A one hundred and fourteen (114) Square foot sign is allowable based on the width of the building being fifty-seven (57) feet lf in this direction.
 - A total of two hundred and ninety six (296) square feet of signage on the northeast side of the site that faces the Right-of-Way of Cobb Parkway. The code currently allows two hundred and forty (240) square feet based on the width of the building being one hundred and twenty (120) feet in this direction.
- Removal of the eight (8) foot landscape strip requirement on the south side of the site adjacent to the Right-of-Way for the on-ramp to I-285.
- Allow for parking spaces depth to be reduced from nineteen (19) feet to eighteen (18) feet.

Please contact me at 678.533.3923 or justin.houston@kimley-horn.com should you have any questions or comments.

Sincerely,

A handwritten signature in black ink, appearing to read 'J. Houston', written over a horizontal line.
